DETAILED ACTION

Claim Objections

1. **Claims 1, 2, 3, 7, 18 and 19** are objected to because of the following informalities:

- Claims 1, 2 and 19: in line 16, change "poltol" to read, "polyol".
- Claims 1, 2 and 19: in line 20, change "measurement wavelengths" to read "wavelength measurements".
- Claim 3, line 2, change "non-form" to read, "non-foam"
- Claim 7 and 18: in line 17, change "poltol" to read, "polyol".
- Claim 7 and 18: in line 21, change "measurement wavelengths" to read "wavelength measurements".
- Claim 19, line 10, change "700nm" to read, "700 nm".

Appropriate correction is required.

Claim Rejections - 35 USC § 103

2. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

3. **Claims 1-4, 6, 7, 9, 10, 14-16, 18, 19 and 21-24** are rejected under 35 U.S.C. 103(a) as being unpatentable over Roberts 6,676,483.

Referring to claims 1-4, 6, 18, 19 and 21-24, Roberts discloses a polishing apparatus having the claimed elements that comprise a polishing pad having a polishing region and a light transmitting region, and the light transmitting material being made of polyester polycarbonate polyol. Roberts does not specifically disclose all the material from the material from which the apparatus is formed. The material from which the apparatus is made can be determined through routine experimentation. It would have been obvious to one having ordinary skill in the art at the time the invention was made to have made Roberts' apparatus of the claimed materials, since it has been held to be within the general skill of a worker in the art to select a known material on the basis of its suitability for the intended use as a matter of obvious design choice. *In re Leshin*, 125 USPQ 416.

Referring to claims 7, 9, 10 and 14-16, as best understood, rejected under 35 U.S.C. 103(a) as being unpatentable over Roberts.

Roberts is described above. In describing the apparatus, implicitly describes the claimed manufacturing step, except disclosing that the solution in which the material was submerged is potassium hydroxide. The use of a particular solution is a matter of engineering expedient since the purpose for which the material is to be used is known. It would have been obvious to one having ordinary skill in the art at the time the invention was made to have used potassium hydroxide as the solution, since it has been held that omission of an element and its function in a combination where the remaining elements perform the same functions as before involves only routine skill in the art. *In re Karlson*, 136 USPQ 184.

Response to Arguments

4. Applicant's arguments filed 7/11/08 have been fully considered but they are not persuasive.

In response to applicant's arguments that US Patent 6,676,483 (to Roberts) does not disclose the claimed materials, selection of the materials are a matter of engineering expedient and are driven by the tasks to be performed; and can be determined through routine experimentation.

Conclusion

5. Applicant's amendment necessitated the new ground(s) of rejection presented in this Office action. Accordingly, **THIS ACTION IS MADE FINAL**. See MPEP § 706.07(a). Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

A shortened statutory period for reply to this final action is set to expire **THREE MONTHS** from the mailing date of this action. In the event a first reply is filed within **TWO MONTHS** of the mailing date of this final action and the advisory action is not mailed until after the end of the **THREE-MONTH** shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of the advisory action. In no event, however, will the statutory period for reply expire later than **SIX MONTHS** from the date of this final action.
